

FEBRUARY 2017!

WELCOME FEBRUARY AND QUARTER 3! Where does the time go!? The new month and new Quarter brings many more opportunities for all 2nd graders to explore and make discoveries across all academic areas. This month the grade will direct their focus on making bundles of ten in math in the hopes of making connections and provide the outlet for conceptual knowledge to take place. Within the subject of science the class will discover the properties of the water cycle. Social studies has been the umbrella theme all year and the students have been responding beautifully to this topic. The month of February will primarily focus on two prominent African American role models such as Jackie Robinson and Harriet Tubman. The students will be challenged and supported with writing prompts and many readings will be focused on these leaders. Within the subject of literacy, a large focus will be based on reading comprehension and inferring. We look forward to working with you to support our awesome 2nd graders!

IMPORTANT

Class Trip TBA (Please look out for permission slips☺)

Week of 2/6 Reading Tests
